DBAion2 Tracker

Your game companion in the world of AION 2

User Guide

VERSION 0.1.4 · DBAION2.RU/TRACKER

GETTING STARTED

What the tracker can do

A companion for AION 2 (Global). It passively reads the game's network traffic through Npcap. It does not change game files or memory, or send anything to the game.

Farming sessions

PRO

Session time, kills, kinah, XP, AP, drops and their value, with totals and per-hour rates.

Goals & challenges

PRO

Track an item, kills, kinah, XP, AP or time, with progress and an estimate to your goal.

PvP

PRO BETA

Solo and party kills, deaths, AP, K/D, streaks and a combat log.

Farm duels

PRO BETA

Compete with another player on a shared goal and watch progress live.

Cube search

PRO

Get an alert and a direction when a hidden cube is nearby. You choose whether to enable it.

Overlay

DPS FARM PRO

A configurable in-game panel for damage, farming, drops and fight summaries.

DPS meter

FREE

Party damage and DPS, target HP and fight history. No separate app required.

Quest helper

FREE

Follow the 1–45 leveling route, see what to do now and where to go next. Asmodians only for now.

English and Russian. Change the interface language in Settings.

Nebula and Nebula Light. Switch themes with the ◐ button in the title bar.

dbaion2.ru database. Open any dropped item on the site with one click.

FIRST LAUNCH

Install & activate PRO

Get the tracker ready in a few minutes with the installer and your license key.

1

Install the tracker

Download the installer from **dbaion2.ru/tracker**. If Windows shows “Windows protected your PC,” choose “More info” → “Run anyway.”

2

Install Npcap

The installer offers to download Npcap from npcap.com. Select “WinPcap API-compatible mode.” The tracker needs Npcap to detect the game.

3

Activate your key

Go to Settings → PRO, enter your **DBA2-...** key and select Activate. Your subscription starts when you activate it.

4

Enter the game

Launch AION 2 and the tracker. Teleport or relog your character so the tracker can identify you.

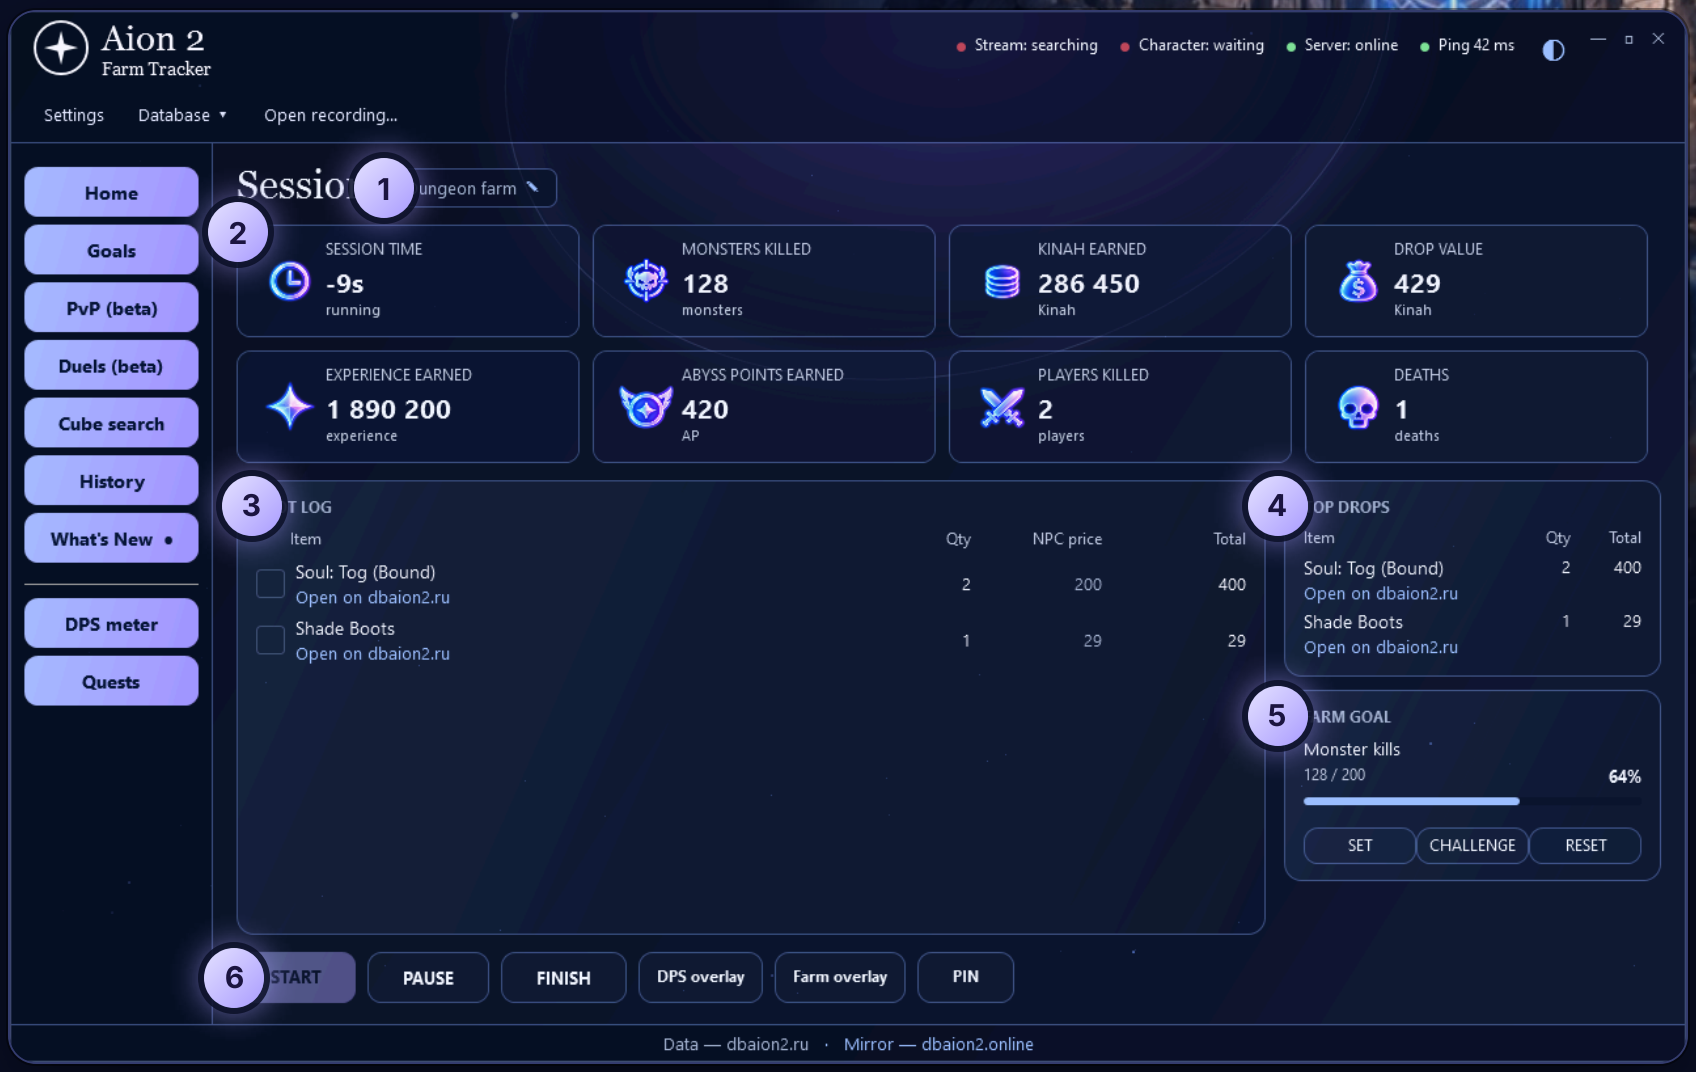
The status bar shows **Traffic**, **Character**, **Server** and **Ping**. Green indicators mean the connection is working.

Your key is linked to one PC · reinstalling Windows does not reset the link

HOME · PRO

Farming session

All your current farming stats in one view, including the value of every drop.



1 Session name
Select the pencil to rename it, for example “Dungeon farming.”

2 Stats
Time, kills, kinah, drop value, XP, AP, player kills and deaths.

3 Loot log
What dropped, how many, and its NPC sell price. Select an item to open it in the database.

4 Top drops
The most valuable finds from this session.

5 Farming goal
Progress and an estimate at your current pace. Set a goal, start a challenge or reset.

6 Controls
Start, pause and finish; DPS and Farm overlays; pin the overlay.

Choose which stat tiles appear in Settings

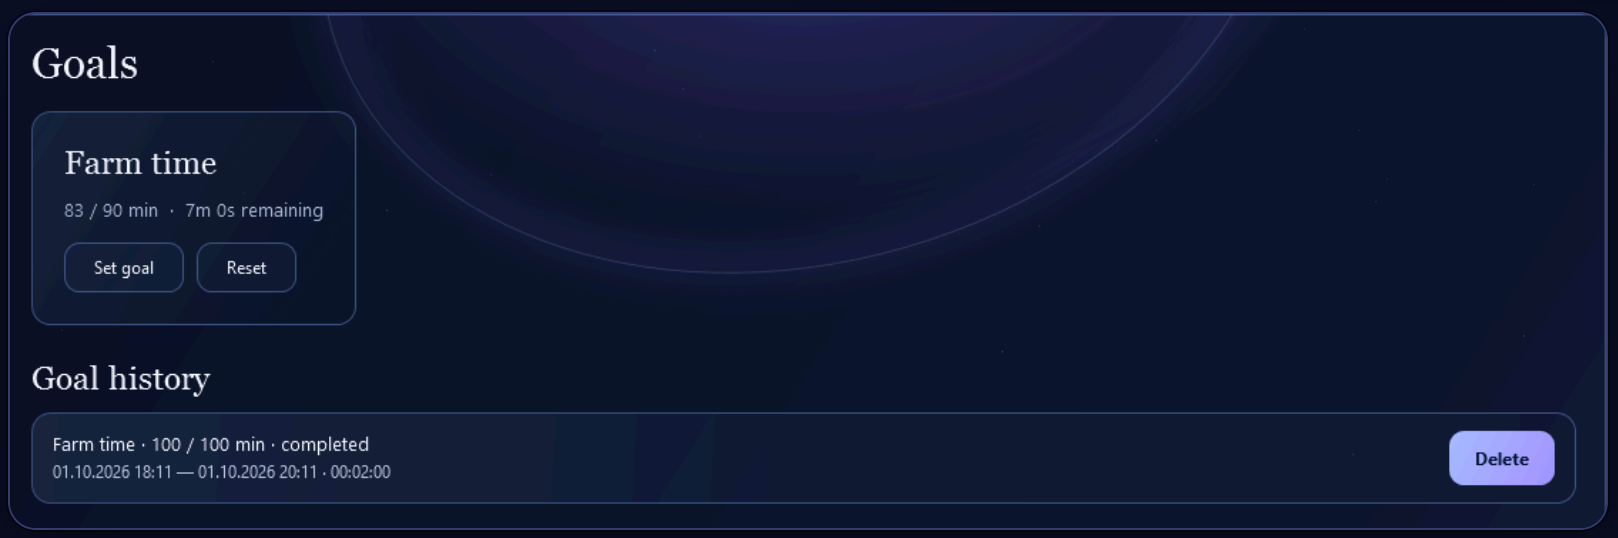
GOALS · PRO

Goals & challenges

Choose what you are farming for. The tracker shows your progress and what remains.

- **8 goal types:** an item, mob kills, a specific mob, kinah, XP, player kills, AP or farming time.
- **Find an item** by name or database ID from dbaion2.ru.
- **Set the amount** by selecting the number at the bottom of the window.
- **Challenge** turns the same goal into a race against the clock.
- **Goal history** keeps completed goals with their date and time.

Tip. Your goal appears on Home and in the overlay, so you can keep playing without switching windows.

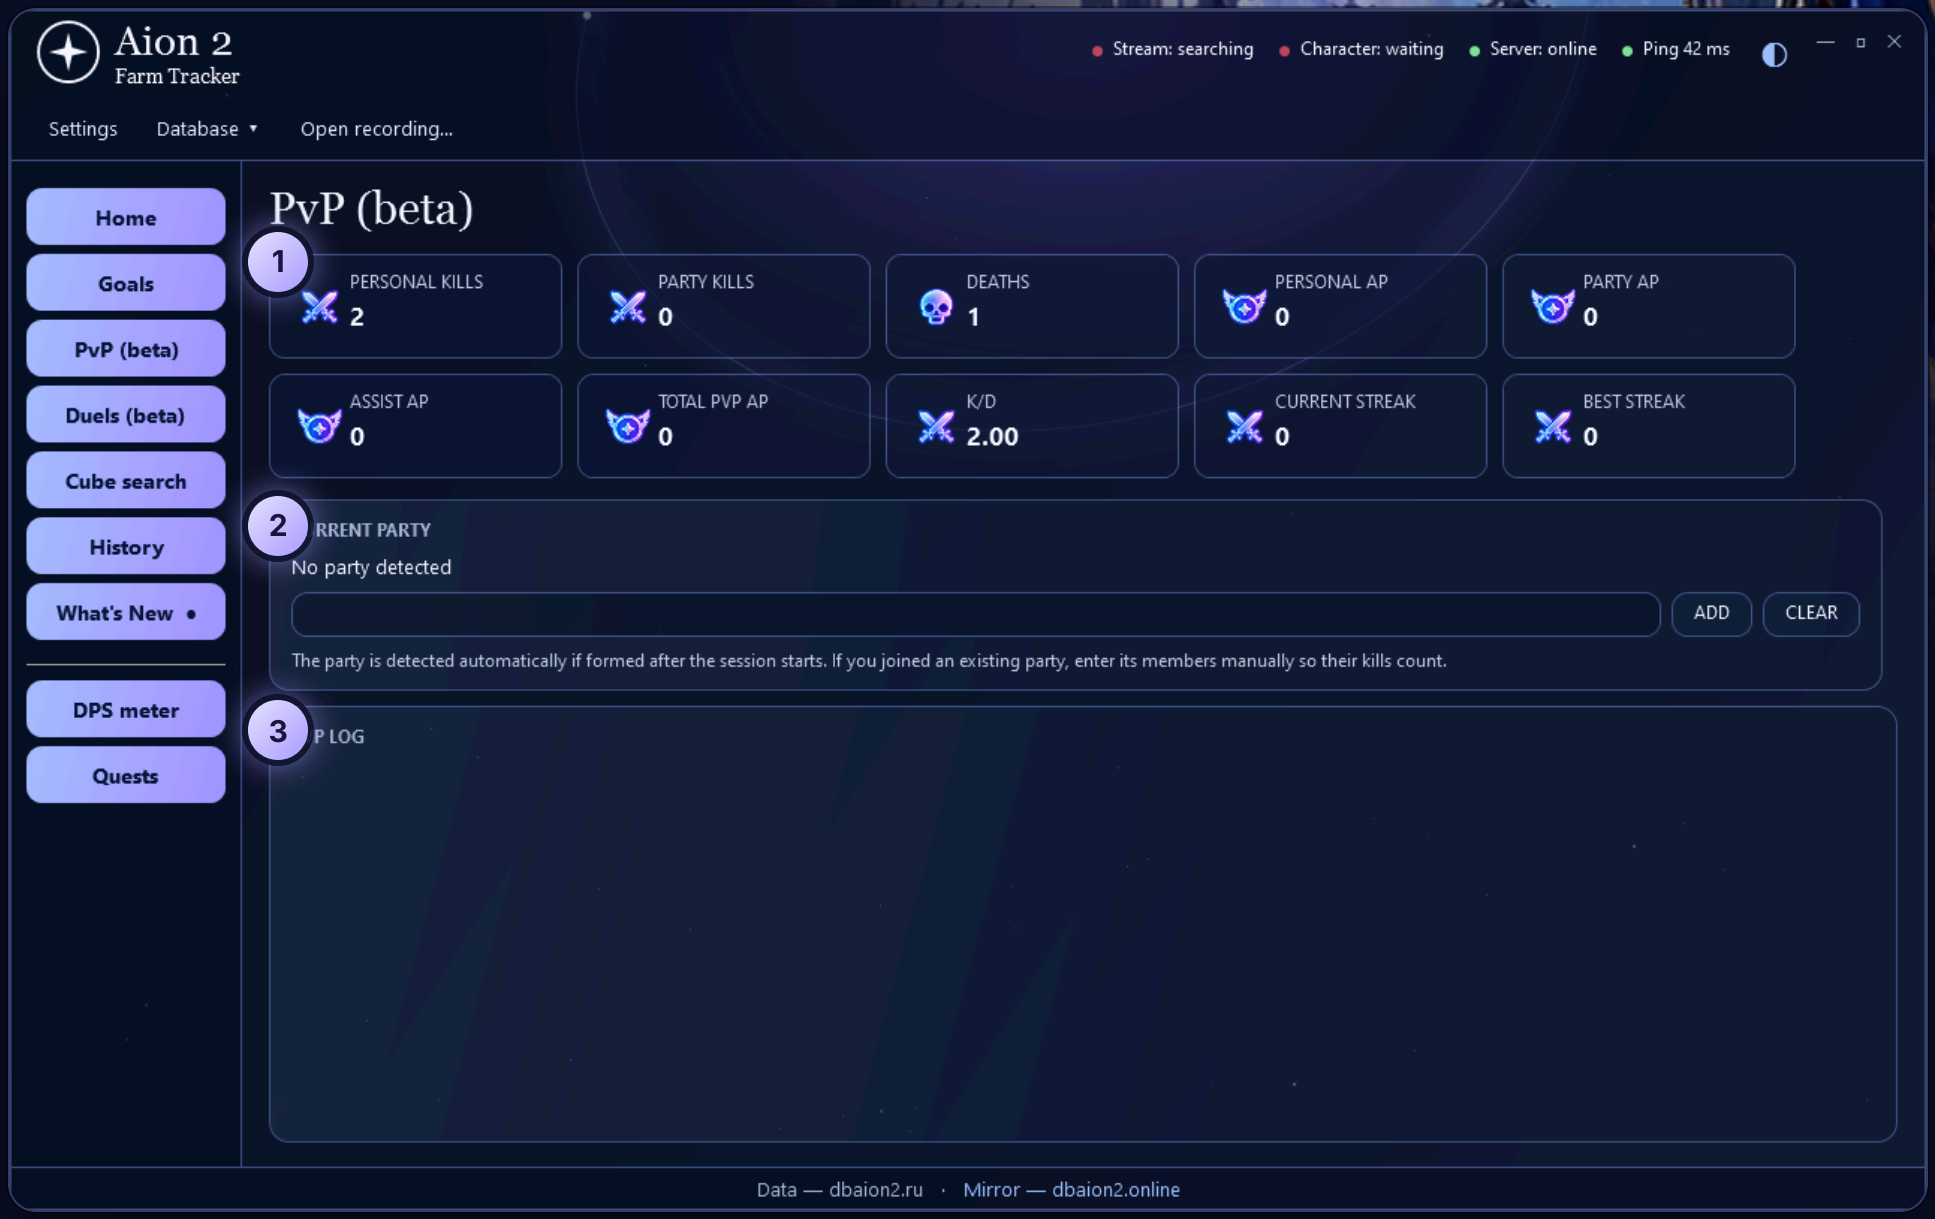


Open Goals from the left menu

PVP · PRO BETA

PvP stats

Your record in the Abyss and battlegrounds: kills, AP and streaks.



1 **Stat cards**
Solo and party kills, deaths, personal and party AP, participation AP, K/D, and current and best streaks.

2 **Current party**
The tracker detects a party formed after your session starts. If you joined an existing party, enter its members manually.

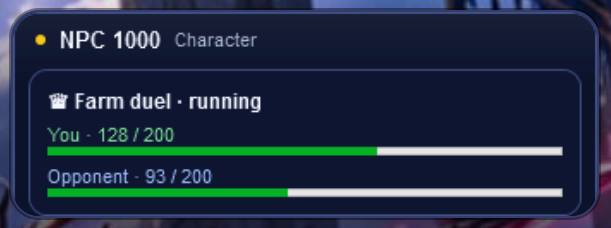
3 **PvP log**
Every kill and death, timestamped. Press Ctrl + Alt + P to switch the overlay to PvP.

PvP is in beta; AP formulas are refined as the game is updated

DUELS · PRO BETA

Farming duels

Race a friend to complete the same farming goal.



Follow the duel in the overlay while you play.

I

Create a room

Choose a goal, such as 200 mob kills, then select Create.

2

Invite your rival

Share the room key. They enter it in their tracker to join.

3

Both ready up

The duel starts when both players are ready. Progress updates live.

4

See the result

The server decides the winner. Copy the result for chat or Discord.

Open Duels (beta) from the left menu

DPS METER · FREE

Damage, measured

The built-in DPS meter is free to use. No separate program required.

1 Encounter target
Name, boss marker, remaining HP, duration and total damage.

2 Party members
Damage per second and share for each player, with a class icon.

3 You
Your character is marked with "◀ YOU" and a highlight.

4 Controls
DPS overlay, pin, current fight, history and reset.

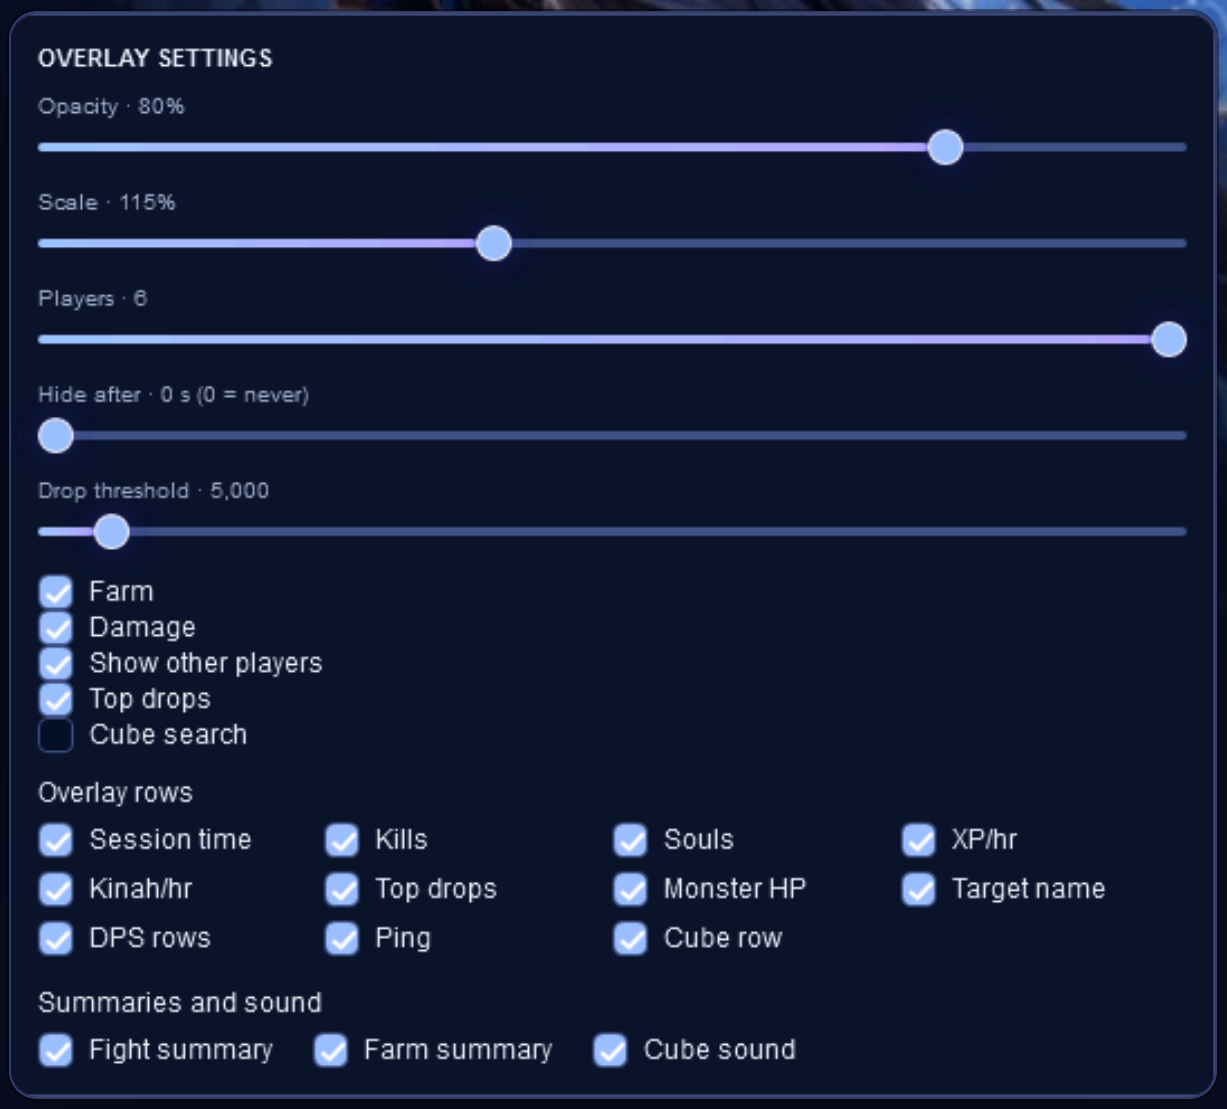
Select a player to see a breakdown of their skills

OVERLAY · DPS FREE FARM PRO

In-game overlay

A compact panel over the game for combat, farming and drops, while AION 2 stays in view.

After a fight, see your DPS, party rank and personal record for that boss.



Select ⚙ in the overlay header to set opacity (down to 0%), scale, party size, auto-hide, drop threshold, visible blocks and rows, summaries and sound.

Hotkeys

Ctrl + Alt + O opens or pins;
Ctrl + Alt + P switches to PvP;
Ctrl + + / Ctrl + − changes tile size.

Pin the overlay

When pinned, mouse clicks pass through to the game. Unpin it to move the panel.

Overlay header

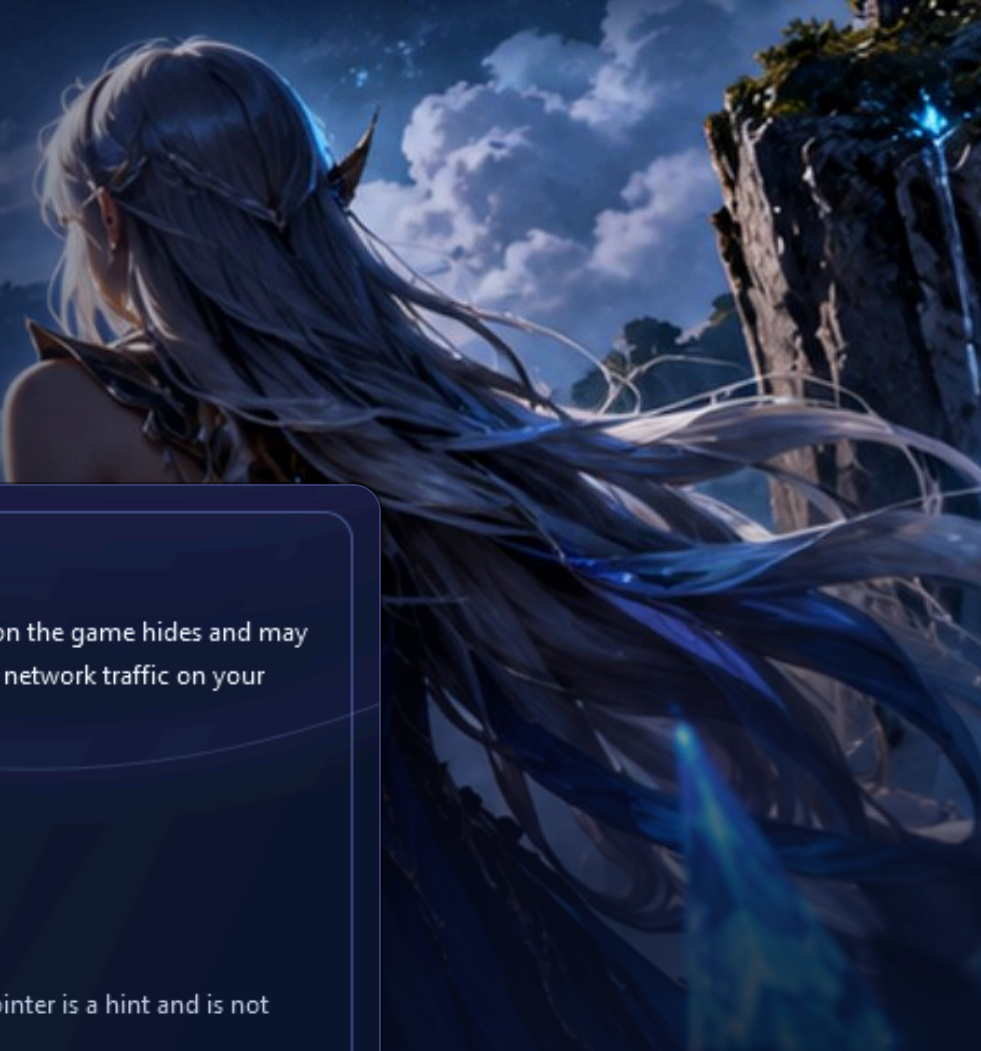
↺ reset, ▤ history, ⚙ settings, ▴ collapse, × close. Drag the header to move it.

Reassign hotkeys in Settings

CUBE SEARCH · PRO

Find hidden cubes

Get an alert and a direction when a hidden cube is nearby.



Experimental feature

A sound and map marker appear when a hidden cube is nearby. This reveals information the game hides and may breach its rules or restrict your account. You use it at your own risk. The app only reads network traffic on your computer and does not interact with the game.

- [ ] I understand the risks and enable this feature
- [x] Sound when a cube appears

  Volume — 50%
- [x] Arrow to cube (reads the minimap from the screen)

  Play in windowed or borderless mode with the minimap at its normal scale. The pointer is a hint and is not always accurate.

Disabled.

In the overlay a cube row appears: “Hidden cube nearby”, an arrow with the distance to the cube and a map icon that opens the spot on the dbaion2.ru map.

1. **You enable it**
   Check “I understand the risks and want to enable this feature.” Cube search stays off until you do.
2. **Sound and volume**
   Hear an alert when a cube appears. Release the Volume slider to preview the new level.
3. **Direction to the cube**
   Reads the minimap from the screen. Use windowed or borderless mode and the regular minimap scale. The arrow is a guide, not always exact.
4. **Cube row in the overlay**
   See where the cube is and how far away it is. Turn the row on in overlay settings.

How it works. Cube search is passive. It uses network traffic that already reaches your PC and the minimap image on screen to point toward a cube. It does not change game files, read game memory or send commands to the game.

Your decision. The feature reveals information the game keeps hidden and may be against the game rules. Whether to use it is your choice, at your own risk.

QUESTS · FREE

Quests 1–45

A 1–45 leveling route: your current quest, what to do now and where to go next. **Asmodians only for now.**

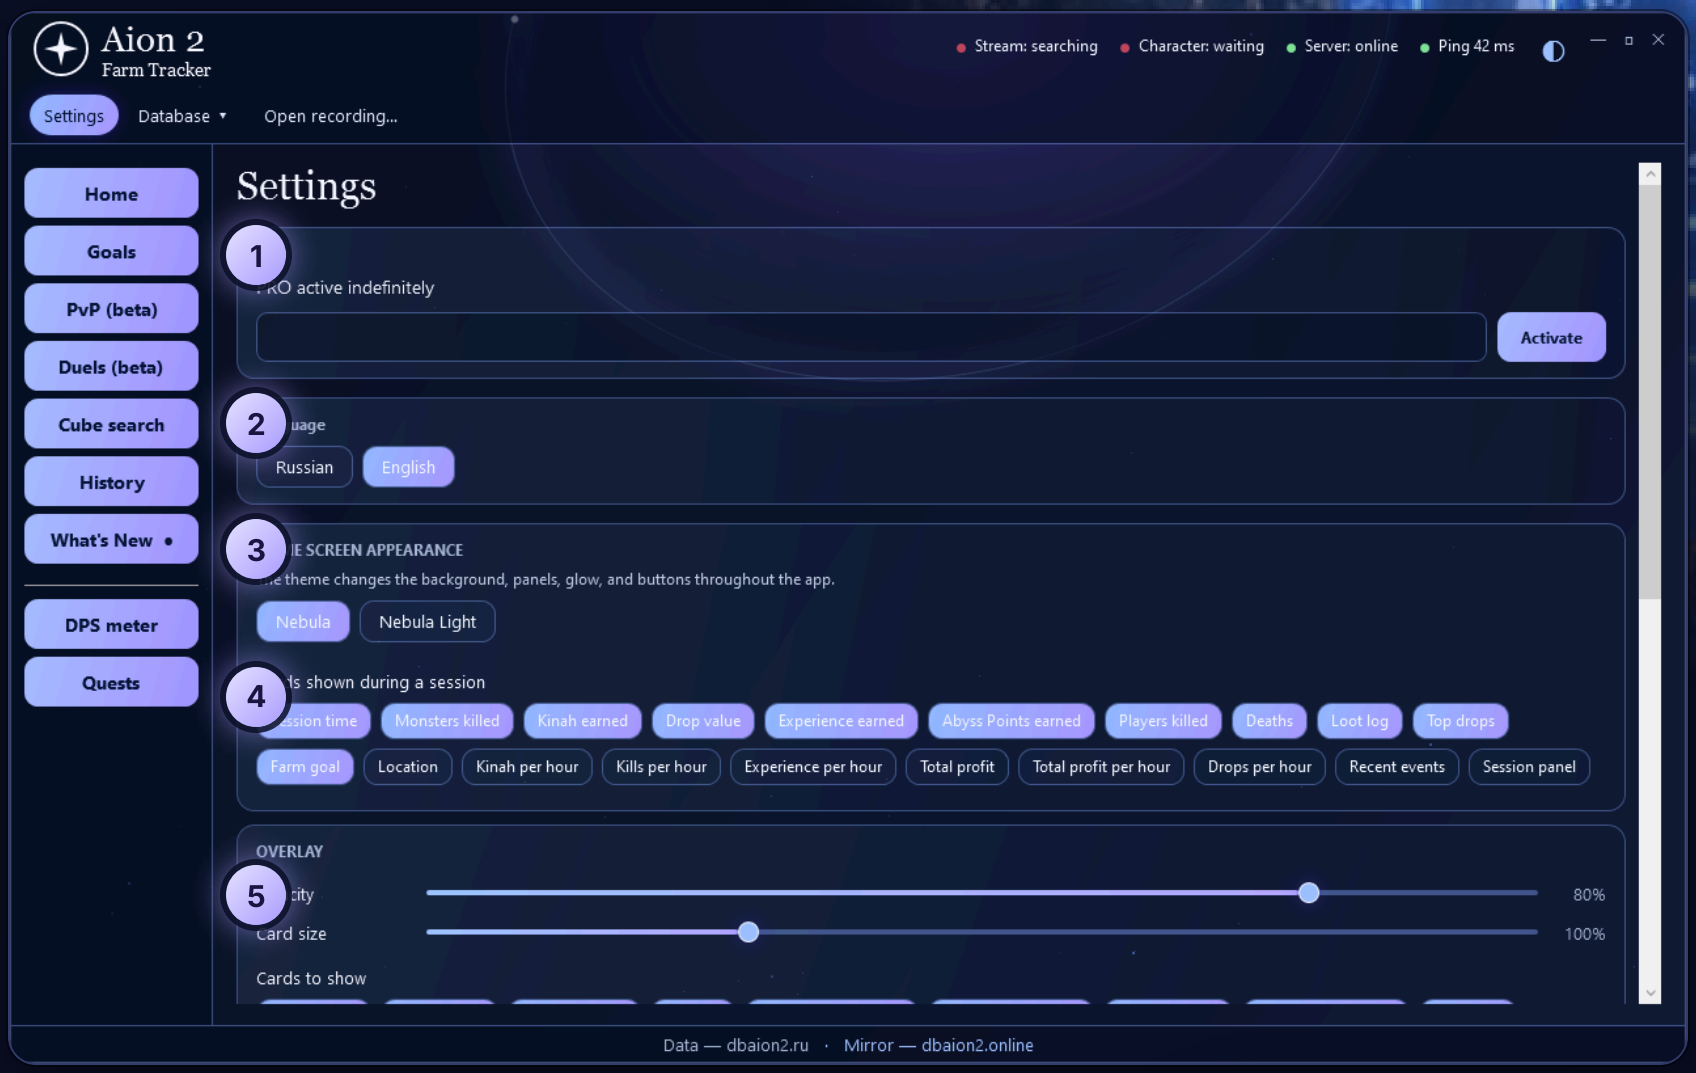
- **Enable it** in the Quests section. The helper runs while the overlay is open.
- **How it finds your quest:** Windows text recognition reads the quest tracker on screen. The game is not modified.
- **Recognition language:** install English or Russian text recognition in Windows.
- **Route steps** show where to go and what comes next. Add your own note to any step.
- **◀ ▶ and Live** move through the route or return to your current step.
- **Recognition trouble?** Select Reset calibration.

The guided route is for Asmodians only for now.

SETTINGS

Settings

Set your language, theme, Home tiles and overlay preferences.



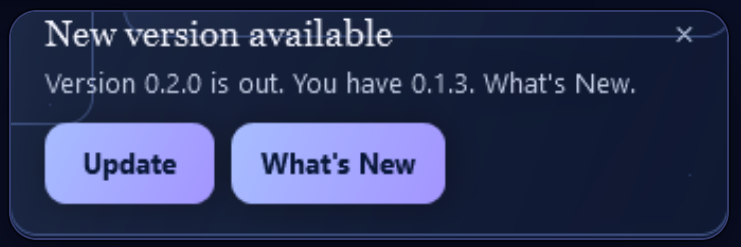
1 **PRO**
Key status and activation field.

2 **Language**
English or Russian.

3 **Theme**
Nebula or Nebula Light.

4 **Session tiles**
Choose what appears on Home.

5 **Overlay**
Opacity, size and hotkeys.



A notification appears when an update is available. Select Update to download and install it, then reopen the tracker.

See the What's New section in the menu for release notes

HELP

Troubleshooting

“Traffic: searching” does not change. Check that Npcap is installed in WinPcap API-compatible mode, then restart the tracker after launching the game.

“Character: waiting.” Teleport or relog your character — the tracker recognises you after a teleport or a relog.

Windows blocks the installer. Select “More info” → “Run anyway.” The installer is not digitally signed yet.

Moving to a new PC. Your key can transfer automatically once every 30 days. Contact support if you need another transfer sooner.

The cube arrow seems off. Use windowed or borderless mode and the regular minimap scale. The arrow is a guide.

A quest is not recognized. Add English or Russian text recognition in Windows, then reset calibration.
